# Net-Services

*This portal includes information on Social Security as an Institution. Being a WEB based version, it allows access to the Social Security Funds central information units.*

*This is an e-administration concept linked to any relational database and integrated via a dynamic website, and which can also be deployed and adjusted by making an interface with any Social Security Information System managing technical branches.*

*Thanks to a remote access, the website provides information on the organization as well as downloading printed matters.*

The on-line service is a customized access, which requires first registration and a password, to two spaces:

**EMPLOYER**

A simple browsing can provide information on registration -activity, declarations, subscribers' account, history of payments, etc. on a confidential basis.

The e-statement which is another function: By submitting statements electronically, visits and delays can be avoided. Standard format statements are downloaded from PCs.

**INSURANT**

A simple browsing can provide information on registration -activity, the family cluster, benefits per branch, files processing and results and history of payments.
